Get started with Card Suite Lite

Download Card Suite Lite app.

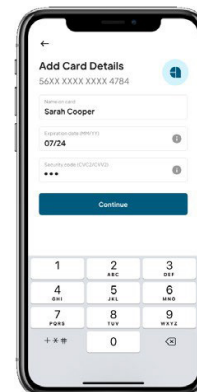

Available in the Google Play and Apple App Store. Compatible with iPads and Android tablets, however some functionality may not work while on Wi-Fi. Supported on following platforms:

- iOS (Oldest version supported: iOS 9),
- Android (Oldest version supported: Android 8.0)

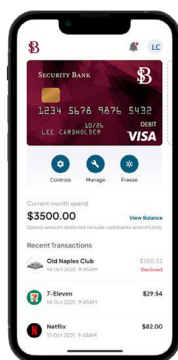

Sign up and enter your card.

Follow prompts to register your card. You will be asked to enter your card number manually or scan the front of your card. Multiple users can register the same card, however the first user to register is considered the owner and is the only user who can share and set controls on the card.

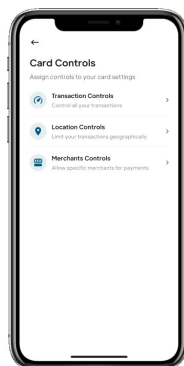

Verify card ownership.

Enter card details. During set up, you will be presented with a two-factor authentication option to verify card ownership with one of the following: Social Security Number, mothers maiden name, date of birth or zip code. Follow prompts to complete card registration and account creation.

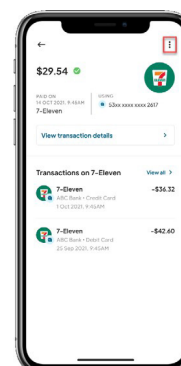

Log into the app.

The first time you log into the app, you will be asked to setup Biometric ID/App Pin. You can update security settings at anytime in the User Profile section of the app. Note: You will be logged out after 5 minutes of inactivity.

Set card controls.

Assign controls to set transaction, location and/or merchant limits on your card. Transaction controls allow you limit types of transactions (ATM, in-store, contactless, e-commerce, mail/phone, autopay and others) as well as overall spend limits per transaction, daily and/or monthly. You can set location parameters by merchant location, zip code, city, state and country. Merchant controls allows you to restrict merchants by category and/or spend limits.

Manage and monitor your card.

You can quickly Freeze/Unfreeze a card from the home screen. If you freeze a card, all transactions will be blocked immediately except for recurring/auto payments. You can view transactions for the last 60 days. We encourage you to monitor your transactions regularly to help prevent unauthorized transactions. You can set custom alerts to notify you of card activity.

Download the Card Suite Lite User Guide for full details.
